Explanations

Product codes E2/03, E2/04, E4/24, E6/01, E6/02, E6/03 and E6/04

For these product codes from 1 January 2023 there is no volume discount for companies putting more than 1 million kilos of ICT devices on the Dutch market.

Product codes E3/04, E3/05 and E3/06

Lamps fall under Stichting OPEN from 1 January 2023 because of the transition of the AVV for lamps from LightRec to Stichting OPEN from 1 January 2023. Setting the rates for these product codes are within the responsibility of Stichting OPEN in consultation with Stichting LightRec.

For system technical reasons, the original product codes E3/01, E3/02 and E3/03 could no longer be maintained in the myOpen portal. New codes were set up, namely E3/04 (previously E3/01), E3/05 (previously E3/02) and E3/06 (previously E3/03).

Product codes E4/22 and E5/15

Producers and importers of solar panels that place inverters specifically intended for solar panels on the market report in this category and can claim the reduced rate of € 0.0065 per kg until 30/6/2023. After submitting the annual statement, a request for this can be submitted by e-mail. Part of the request should be a breakdown of the report for solar panel inverters and other measurement and control equipment.

From 1/7/2023, inverters will be subject to the set tariffs of € 0.020/kg for E4/22 and € 0.030/kg for E5/15.

Product codes E4/26, E4/27, E4/28, E5/17, E5/18 and E5/19

On these product codes for luminaires, no distinction based on size applies, but on weight (>750 grams or ≤750 grams).

Product code E4/32

A tariff of € 0.0065/kg applies to product code E4/32 - solar panels until 30/6/2023. The tariff will change to € 0.040/kg from 1/7/2023. A separate letter for this has been sent out to the relevant producers and importers.
